**SUPPLEMENTAL DECLARATION**

Toshiharu Nogi and Frank W. Hunt, co-inventors of the above-identified patent and Applicants herein, declare as follows:

1. Applicants believe the original patent to be partly inoperative or invalid by reason of the patentee claiming less than we had a right to claim in the patent.

2. The error in claiming less than the patentee had a right to claim arose through error. This error occurred through inadequate communication between Applicants and their patent attorney during the original prosecution of the patent application resulting in the original patent. Specifically, Applicants failed to adequately communicate with their patent attorney during the original prosecution of this patent as to the important features of the invention now set forth in the newly submitted patent claims.

3. All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the Applicants.

4. Applicants have reviewed and understand the contents of the specification, including the claims, as amended by any amendment specifically referred to the oath/declaration.

5. Applicants believe the named inventors to be the original and the first inventors of the subject matter which is claimed and for which a patent is sought.

6. Applicants acknowledge the duty to disclose to the Patent Office all information known to the Applicants to be material to patentability as defined in 37 CFR 1.56.

7. Every error in the patent which was corrected in the present reissue application and is not covered by the prior declaration submitted in this application arose without any deceptive intention on the part of the Applicants.

8. Applicants offer to surrender the original patent.

We declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
